

IS YOUR TROUBLE IN YOUR HEAD?

The above diagram shows one nostril, the hollow places inside your head, the brain and the tube leading to one ear.

WHY IT IS RISKY To Have Clogged Nostrils

The inside of the lower part of your head is hollow and holds the things you think with, hear with, taste with, smell with, talk with and act with.

If you think right, see right, hear right, smell right, taste right, talk right and act right, you will amount to something. The only difference between the employer and his hired help is the difference between the working of their thinking and acting machinery.

If your nostrils are clogged the air does not circulate through your head as it should and the result is your brain is not cooled. A hot brain will not work right.

With such a brain you do not rest well at night, but get up tired and stupid. You cannot collect your thoughts, cannot concentrate your mind on your work. The discomfort and misery of clogged nostrils is great. When your nostrils are stopped up you must keep your mouth open to get enough air. Breathing with the mouth open changes the expression of the face. Those with clogged nostrils soon develop a dull, stupid look in the face.

Catarth sufferers often have a feeling of heaviness or deep, dull pain across the forehead and in the temples. This feeling is not only annoying but may be so severe as to prevent the proper acting of the brain.

In most cases of clogged nostrils there is considerable discharge, post-nasal drip. This discharge may be watery and thin or it may be tough and sticky and it may be tough and sticky and it may be tough and sticky.

In others with catarth the discharge dries up in the nostrils and forms yellowish or brown crusts and scales. This dried discharge cannot be expelled by blowing the nose, but remains in the nostrils and may clog them tight.

The tough discharge dries in the nostrils and collect all sorts of germs that may be in the air. The germs cause the discharge. To decay. This gives the breath a bad odor.

In many cases clogged nostrils bring on asthma. In others they cause pain in various parts of the head. In others it causes dizzy spells. In still others it causes head noises, deafness or discharging ears.

Operation on Jeffries's Nostrils

Mr. James J. Jeffries, the famous pugilist, went all the way to Europe to have his clogged nostrils opened. The surgeon of the Old World wanted to cut away the bones inside his nostrils. As this would weaken his nose, he refused to allow them to operate on him.

On Mr. Jeffries's return to this country he learned that a New York surgeon was treating clogged nostrils by an electrical operation, without cutting away the bones of the nose. Mr. Jeffries consulted with the doctor, explained the operation, and did not interfere with his work. After the operation his nostrils were free, and his breathing, that had been labored, became easy again.

The case of Mr. Jeffries is cited as showing how clogged nostrils may be opened without cutting away the bones in the nose by the use of an electrical operation.

Clogged Nostrils, Dropping in Throat, Deafness and Head Noises

Mr. Robert Allen resides at No. 314 54 ave. New York. When he first consulted me for clogged nostrils, he had been suffering for twenty years. He said he could not breathe through his nostrils at all. He could only breathe through his mouth. He had a constant discharge from his nostrils. He had a constant discharge from his nostrils. He had a constant discharge from his nostrils.

Mr. Allen's case is cited as showing how clogged nostrils may be opened without cutting away the bones in the nose by the use of an electrical operation.

8 Visits for \$5

The reason why many people suffering from catarth troubles are not cured is because they cannot afford to receive proper treatment often enough.

The offer of the nominal fee rate of 8 visits for \$5 is given at this time by Dr. McCoy so that all sufferers from catarth diseases may afford to receive treatment as often as it is needed.

I take this opportunity of notifying all those who require treatment for catarth troubles that until Jan. 1, my fees for treatment will be a change of \$5.00 for eight complete treatments. This fee will include all necessary treatment and medicine.

In order to take advantage of this low offer it will be necessary to visit my office and enroll your name on or before Dec. 31. All patients who begin their treatment before Jan. 1 will receive treatment as long as they require it without any increase in the fee.

With the low offer my treatment will remain the same as the treatment was when my fees were high.

My specialty is treating clogged nostrils, treating deafness and head noises, and treating all diseases of the breathing tubes. I have spent thirty years in the study of these diseases. I have discovered I have made a man at last able to treat deafness and head noises without using any medicine.

How important is my method of treatment will be shown in the following cases:

ARE YOU GOING DEAF?

DEAFNESS AND HEAD NOISES

When Mr. Edward J. Dunn first consulted me he said: "I caught cold five years ago, and the cold settled in my ears. I had awful noises in my ears that sounded like steam escaping and bells ringing."

My hearing got so bad that while I could hear the voices of those who were talking around me I could not understand what the speakers said. When I stood close to me I could not hear it. If I put my hand right up to my ear I could not hear it. While I lived in the house I could not hear it. I could not hear the noise made by the train.

After I treated Mr. Dunn he reports that he can hear conversation as well as ever he could, and that he can hear his watch tick when he holds it to his ear. Mr. Dunn resides at No. 412 West 17th st., New York.

DISCHARGING EARS, DEAFNESS, HEAD NOISES.

When Mr. Edward Foley first consulted me he said: "My right ear began to trouble me 28 years ago. Two years ago my left ear began to bother me. My right ear discharged for 28 years. I got a discharge from my left ear. I got a discharge from my left ear. I got a discharge from my left ear."

Mr. Foley's case is cited as showing how clogged nostrils may be opened without cutting away the bones in the nose by the use of an electrical operation.

WHAT IS YOUR FAMILY BUDGET?

Prize Competition of The Evening World Brings Out Many Interesting Letters That Reveal Competent Domestic Financiers.

By Marguerite Mooers Marshall.

What is your family budget?

Already I have received many interesting answers to this question, several of which are published below. During the competition for the fifty dollars in prizes which The Evening World has offered to the compilers of the seven most sensible, well-balanced and economical household budgets, selected letters from our budget-makers will be printed daily. Our column thus will serve as a sort of clearing house for the ideas of efficient domestic financiers.

One point which several of them emphasize to-day is the possibility of saving money from even a small weekly revenue. The New Yorker has a bad reputation for thrift. If he isn't in debt he at least is supposed to be living up to the very last penny of his income. And do you remember what Arnold Bennett says about that, in his excellent little volume, "Married Life"? "You are one of those brave, jolly fellows who live up to their income."

"Conceive that three years have passed and that you are in fact dead. Look through the sod. Do you see that child there playing with a razor? It is your eldest son at grips with your business. Do you see that other youngster striving against a wolf with a lead pencil for weapon? It is your second son. Do you see these four creatures with their hands cut off, thrust out into the infested desert? They are your wife and your daughters. You deliberately deprived them of the most valuable factor in existence—genuine responsibility."

"Your wife would have been happier had she been permitted to feel the weight of the estate and to share understandingly the anxieties of your wonderful business. Your girls would have been happier had they been cast forth into the real world to learn its customs, and the terms on which food and raiment and respect can be obtained in it, and the ability to obtain them. You are the most dangerous sort of scoundrel—the smiling, benevolent scoundrel."

It is women who have been given responsibility in handling domestic finances from whom we hear to-day, and let their letters testify to their good sense and conscientiousness! Meanwhile, send in your own budget story, with the figures, of how you live efficiently and happily on your income. You may win one of The Evening World's prizes.

"Dear Madam: I've been asked quite a number of times by my friends how I manage to get along on a small salary and still keep my children looking fairly well dressed. It's very hard to tell any one who's been used to having and spending a deal of money. I've never had much money and I've learned to get along

fairly well on little.

"My husband's salary is \$12 weekly, and we have three children, ages eight years, four years and six months. I do all my own sewing for the whole family, and I buy my cloth of as good quality as I can afford, and in large quantities. My husband and I wear our suits several years. I cook only nourishing foods, and buy two tons of coal every summer when its cheapest. I've saved \$200 in six years on \$14 a week."

"One year ago my husband lost his position and was home a long time, and our savings dropped down to \$25. Two weeks ago my husband started to work again, for \$12 this time, and I expect to save some of that but not until after Christmas, as we need it all just at present. I will try to give an itemized list as nearly as I can remember:

Per week:
Rent.....(about) \$2.00
Gas.....(about) 2.25
Meat.....2.25
Groceries.....1.25
Milk, Grade A, from milk station......35
Vegetables, such as greens, for soup......35
Carfare and lunch.....1.20
Potatoes (three barrels), last six months, at \$2 per barrel, and coal (two tons, at \$6 per ton), lasts one year.....\$9.51

We go to the theatre about three times during the season, and we take the children to the beaches and parks a few times during the summer, but as we live in the country we have fresh air and freedom for the children during the day, as we have only three rooms to live in. Let me also state that we bought most of our furniture on the installment plan in our first few years. Don't think it's been easy for me to do what I have done with a small salary, but I feel all at once.

MRS. F. M.

"Dear Madam: I have been mar-

ried three years and have one baby. My husband earns \$17 per week throughout the year. I live in three rooms, for which I pay \$14.50 per month. My rooms are heated by gas and with cooking the bill amounts to \$1.50 per month. When I get my salary at the end of the week I divide my money the following way:

Four dollars I put away for rent and gas. Two dollars I give my husband, out of which he pays car fare and dinner. My table expenses are one dollar a day, from which I put away nine cents for the milk man. I cook three meals a day dinner for the baby and myself. I still have \$5 left, and from that I keep \$1.50 for clothes and 50 cents for washing materials such as soap, powder, etc. The other three dollars I save faithfully every week for a rainy day.

Mrs. H. G.

"Dear Madam: My brother is a young man of twenty-one, and has been married six months on the salary of \$12 a week. He has three nice rooms in lower Bronx, for which he pays \$12 a week.

"Every fourth week his wife gets \$7, with which she stocks up in foodstuffs that will last to the end of the month. Then every week following she gets \$3, with which she buys meat four times a week and vegetables and things which they eat immediately. This leaves him \$30. Out of this he pays \$12 rent, \$2 insurance and keeps \$4 for himself (he does not need carfare nor lunch money, as he works nearby). Then he counts on \$5 for little things; such as going to a show or some little necessary purchases for himself or his wife. This leaves about \$9 he can lay aside. When they need clothes they draw the sum needed from the bank."

"One month that I went to see them they had nothing saved, as his wife had been ill a short time. But they save on an average of \$8 a month. This, I think, is doing pretty well, considering my brother's small salary."

MRS. F. M.

"Dear Madam: I have been mar-

ried three years and have one baby. My husband earns \$17 per week throughout the year. I live in three rooms, for which I pay \$14.50 per month. LITTLE TOWN OF MOOSUP ASTIR OVER REMARKABLE RECOVERY OF INHABITANT

Woman Helpless for Years From Rheumatism Devised
Ropes Rigged From Ceiling to Lift Her From Bed.

The little town of Moosup, Conn., is all agog over what they consider almost a miracle in the recovery of one of their town's people, Mrs. Fanny A. Cheney.

Hearing of the story, several people from Boston journeyed to the village to get the facts direct. There was no difficulty in finding Mrs. Cheney's home, as it was pointed out immediately on inquiry.

A lady perhaps some fifty odd years met us at the door, and when asked for Mrs. Cheney smilingly invited us in and good-naturedly informed us that she was Mrs. Cheney. "So you came to see me about my case; every one in Moosup is talking about it, and I am not surprised, for I have been an invalid a long time."

"I suffered from rheumatism of the joints for five years. I believe every joint in my body was affected. My hands, wrists, knees, feet were swollen from a chalky deposit and I was helpless. Physicians wanted to operate on me and try to remove the deposit. My legs were drawn up so that

they could not be straightened, and to have anyone lift me from the bed was agony unbearable. For one year I did not leave the bed without assistance. How helpless I was and what I suffered only God and myself know."

"The rector of St. Alban's Church in Danvers knows my condition, for he called on me while I was confined to bed for the purpose of giving me communion. When I started on Varne-sis I was in bed and continually getting worse, and for almost a year I did not see very much improvement except that my stomach was better and my strength began to return."

"From an absolutely helpless cripple who could only turn in bed with the aid of a rope rigged overhead, I am now walking about as you see me, without the aid of a crutch or cane. From day to day I can see I am getting better. I thank God for the knowledge that brought Varne-sis to me and I have often prayed that Mr. Varney might be long spared for a continuance in the work that he is doing for sufferers."

"There is hardly a person in this

section who does not know about my condition, and I am glad you called, for it may be the means of helping other sufferers. In fact I am always glad to hear from any rheumatic sufferers and let them know how I regained my health. My address is Post Office Box 134, Moosup, Connecticut. I have loaned my wheel chair, crutches, pulley and shoes to Varne-sis to add to the collection in Boston."

Hundreds of rheumatic sufferers have recovered their health through Varne-sis after ordinary remedies have failed. Varne-sis does not contain salicylates, iodides, colchicum or the usual drugs so often given, but is composed of roots, herbs and barks. No rheumatic can afford to ignore Varne-sis.

Send to W. A. Varney, Lynn, Mass., for the newspaper devoted to rheumatism.

Get Varne-sis now, to-day, at Riker-Hegeman and other reliable druggists. Tell your druggist to get Varne-sis for you from his wholesaler or send to W. A. Varney, Lynn, Mass.—Adv.

**This Fine PIPE
Fits SMOKAROLS**

The best known, most smoked pipe in the world is

The Wellington
THE UNIVERSAL PIPE

All of the 25-cent size of
WELLINGTONS are adapted to fit
SMOKAROLS

Fine French briar with solid rubber bit, made and guaranteed by the world's largest pipe makers. At all smoke-shops.
